Abstract— The goal of this article is to give you basic instructions for preparing papers for the 2022 International Symposium on Micro-NanoMechatronics and Human Science (MHS2022). Please prepare your manuscripts following the guidelines described in this article.

1. Introduction

The goal is to prepare your manuscript for the 2022 International Symposium on Micro-NanoMechatronics and Human Science (MHS2022). Manuscripts must be provided in electronic format, with all images embedded. Only PC formatted materials can be accepted (no Mac computer materials), and **PDF file** is required. To ensure that papers will be reproduced clearly and in proper size and form, authors should observe the following instructions.

2. Format

The size of the paper should be A4 paper (21.0 cm x 29.7 cm), as already configured on the header of the template.

2.1 Size of the paper

Set top margin to 43.4 mm (1.7 in), bottom margin to 25.4 mm (1 in), left margin to 18 mm (0.7 in) and right margin to 12 mm (0.47 in). The column width is 88 mm (3.5 in). The space between the two columns is 5 mm (0.2 in).

2.2 Paper Type

Authors can select the paper type between short paper and full paper. Paper type cannot be changed after the notification of acceptance.

- Short paper: 1-3 pages. Paper is not uploaded to IEEE Xplore.
- Full paper: 4-6 pages. Paper could be uploaded to IEEE Xplore if the authors want to.

3. TYPE SIZE AND FONTS

Try to follow the type sizes as below as best you can:

The manuscript must use fonts that allow embedding and subsetting (including the base fonts). Failure to embed and

TABLE I. size of the font

Paper Title:	14 points,	bold
Authors' Names:	12 points,	Italic
Authors' Affiliation:	10 points,	regular
Main Text:	10 points,	regular
Or	9 points,	regular (optional)
Section Title:	10 points,	bold
Abstract:	10 points,	bold
Figure Captions:	8 points,	regular
Footnotes:	8 points,	regular

subset fonts is the biggest obstacle to PDF compliance with IEEE Xplore.

- All Type 1 fonts are embeddable.
- Only some TrueType fonts are embeddable.
- Open Type fonts are acceptable as long as they are embedded subset.
- Do not embed fonts in a graphic file.

4. Graphics

The graphics of the manuscript should have the resolution of 300 dpi or higher. Do not link to some graphic directly to the article outside the manuscript. Insert all of the graphics into the manuscript.

5. Headings

5.1 Title of your paper and the abstract

Center the title on the page so as to run across the upper portion of the paper. The name of the authors, their affiliation, their address and countries should be also centered using fonts described in the previous section. A brief abstract with one column width should be included as the first paragraph of the paper.

5.2 Major Headings and Subheadings

Major headings are centered in the column. Subheadings are placed flash on the left margin of the column on a separate line.

In the TEX template, *section*, and *subsection* are configured for the indication.

6. Copyright

The accepted full papers shall become the exclusive copy right of the IEEE Robotics and Automation Society and may not be reproduced elsewhere without the Societys permission.

7. DUE DATE

All authors are strictly required to keep the deadline. Final manuscript and abstract with IEEE Copyright Form should be submitted by July 15, 2022.

ACKNOWLEDGMENT

Here is the region for the acknowledgment.

The template will number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]–do not use "Ref. [3]" or "reference [3]" except at the beginning of a sentence: "Reference [3] was the first . . ."
